Explanation of Rate Adjustments

The City of Banning contracts the collection, transportation and disposal of solid waste services through Waste Management of the Inland Empire. Waste Management has completed a review of the cost components of the contracted rates to comply with all health, safety and service requirements. Due to increasing operational costs and mandatory commercial organic recycling programs the following rate adjustments on the attached chart are proposed at this time beginning on October 1, 2016.

By approval of this rate increase, you also authorize future rate increases based on the Consumer Price Index (CPI) formula (defined below) or an alternative formulaic, automatic adjustment (also defined below) for an additional four-year period without further hearing or protest; such automatic adjustments to be in 2017, 2018, 2019, 2020 commencing on or after July 1 in each of such years. Note: CPI is an index of prices used to measure the change in the cost of basic goods and services in comparison with a fixed based period, also known as a cost-of-living index. The CPI or other measure of automatic annual adjustments to be used will be as follows:

- i. Service Component. The Service Component comprises sixty-five percent (65%) of the rate. The Service Component will be adjusted by the average of the monthly percentage increases in the Consumer Price Index ("CPI"), All Urban Consumers, for the Los Angeles/Orange County/Riverside Area as published by the United States Department of Labor, Bureau of Labor Statistics, for the March to February period immediately preceding the effective date of rate adjustment.
- ii. Disposal/Green Waste Processing Component. The Disposal/Green Waste Processing Component comprises thirty five percent (35%) of the rate and will be adjusted by the greater of either (1) the average of the monthly percentage increases in the CPI for the March to February period immediately preceding the effective date of the rate adjustment; or (2) the percentage increase in the per ton tipping fee established by the Riverside County Waste Management Department for disposal of Solid Waste generated within Riverside County at landfills comprising the County System (Badlands Landfill, Lamb Canyon Landfill, El Sobrante Landfill) for the March to February period immediately preceding the effective date of the rate adjustment.

The City Council may in its discretion adopt such increases without further hearing and protest proceedings. The schedule of proposed rate adjustments covered by this notice will be for a period of five years starting from the effective date of the first increase.

If you wish to legally challenge any action taken by the City on the solid waste rate increases, you may be limited to raising only those issues you or someone else raised prior to or at the public hearing as described in this notice.
